

Attack Prescription Spend

SHARx is the Rx Solution that Delivers 50% - 70% Reduction in Employer Rx Spend

THE CHALLENGE. Year after year, employers struggle with the **escalating cost of medications** and the **impact they have on the total health spend**. This is the reason we developed the SHARx program, to allow employers to reduce their overall prescription spend by eliminating the risk of high cost medications.

THE SOLUTION. The SHARx solution creates a **\$0 cost share for employees** while maintaining employee access to all prescriptions. We are fully transparent, and are driven by a desire to first take care of each plan member's needs while lowering the burden on employers. Our fees are a simple per employee per month model with an average ROI of 5:1, and we put them at risk. SHARx is ideal for Self-Funded groups or those looking to go Self-Funded.

THE PROBLEM. Member takes Stelara every 8 weeks. Member pays \$250; Employer pays \$9,365.

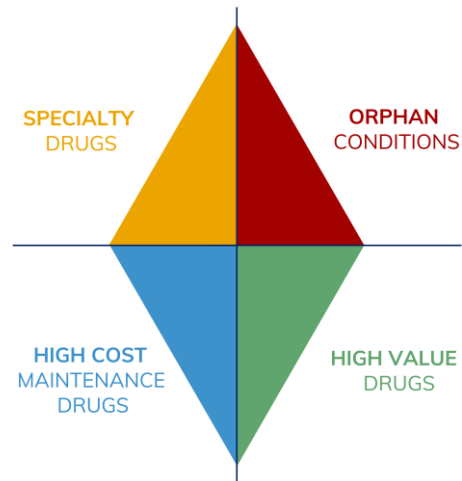

USING SHARx. Member gets **Stelara for FREE** – Shipped directly to member's house.

THE RESULT. Member saves **\$1,750 per year**. Employer saves **\$65,555 per year**.

SHARx Runs Smoothly Through Easy-to-Use Technology

- Simplifies the process.
- Third-Party integrations.
- Streamlines onboarding.
- Tracks fulfillment.

SHARx **saves** employers an average of **\$1,100 per enrolled employee**. The employee saves an average of \$800 annually.

The Talk....

Every year, high cost specialty med utilization by a few team members would drastically impact our medical costs. We had concerns about the initial communication, but our team members received the assistance they needed to help make the transition smooth. **We have saved over \$222,000 the first year** and our team members saved significant dollars on their co-pays. A win/win for sure.

- Reid Willen, CFO, Bucheit

“The portal was extremely easy! Frankly, I didn't expect it to be easy as it was.”

- HR Manager of Lumber Company

“I was taking medicine for my cystic acne. I had painful bumps all over my face, back, and chest. The **medicine was not covered by the medical plan**, but through the program, **I got my medicine that was \$800 a month for \$0**. A big thanks to my employer for putting this program in place for us.”
